SKILLS

- ❖ **Programming Language :** Java, JavaScript
- ❖ **Web Technology :** HTML, CSS, Bootstrap, React JS, WordPress, Git
- ❖ **Methodology :** Object-Oriented Programming System

EDUCATION

- ❖ Electrical Engineering
Future Institute Of Engineering And Management CGPA: 8.57 | 2023
- ❖ XII (WBCHSE) | Nurpur High School Percentage: 65.5 | 2019
- ❖ X (WBBSE) | Baharal PLS High School Percentage: 66.2 | 2017

PROJECTS

- ❖ **Currency Converter Web Application**
 - Frontend Development: Utilized HTML for structuring the web page, CSS for styling, and JavaScript for dynamic content and logic implementation.
 - API Integration: Integrated with a third-party currency exchange API to fetch real-time exchange rates.
- ❖ **Stone, Paper & Scissors Game**
 - Designed and coded the user interface using HTML and CSS, ensuring accessibility and responsiveness across various devices.
 - Implemented game logic and algorithms in JavaScript, including random selection for computer opponent and outcome determination based on user choices.
- ❖ **Responsive Social Media Website with Theme Customization**
 - HTML: Used for structuring web pages and organizing content.
 - CSS: Implemented for styling the website, including layout design, and responsive design.
 - JavaScript: Implemented for interactive features, such as dynamic content loading, form validation, and theme customization.
- ❖ **E-Commerce Website Development (React)**
 - Utilized React.js for building dynamic and interactive user interfaces, enhancing user experience and engagement.
 - Implemented Redux for state management, ensuring efficient data flow and consistency across application components.
 - Employed TypeScript for static typing, improving code quality and developer productivity.
 - Tailwind CSS for streamlined UI development, enabling rapid prototyping styling.
- ❖ **Developed Spotify and Amazon Clone, Todo App, Artflare Website Clone.**
 - Developed using HTML, CSS, JavaScript, and PSD.
